                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               cc nucleic acids and polypeptides are useful for treating or preventing a companies and polypeptides are useful for companies and polypeptide in a human. They are useful for companies the presence of or predisposition to a discase associated with altered levels of IFN polypeptide or polynucleotide. IFN nucleic cards, polypeptides and antibodies are useful for diagnosis, prevention or treatment of variety of immunological and cell proliferative consumptions or treatment of variety of immunological and cell proliferative dimunological self-treatment of variety of immunological and cell proliferative consumptions. The provention of the munocoefficiency diseases such as acquired immunologic former such as acquired immunologic diseases such as aplastic anaemia and chronic neutropenia consumptions diseases such as aplastic anaemia and chronic neutropenia candidated various disorders associated with cell death, including alpheimer's and companies of the diseases including alpheimer's and companies and compounds which inhibit or enhance IFN activity or diseases, amyotrophic lateral scherosis and spinal muscular atrophy. IFN nucleic acids and polypeptides are also useful for diseases, and compounds which inhibit or enhance IFN activity or function and as targets for the identification of small molecules that are immunostimulatory, immunosuppressive, or stimulate or suppress normal contributions.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Matches
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       New interferon induced polypeptides and polynucleotides, useful for the diagnosis, prevention and treatment of immunological, sell proliferative disorders, such as lupus erythematosus, "ancer, stroke and Alzheimer's disease

or treatment of variety of immunological and cell prolificative considers, such as autoimmune diseases e.g. hupus crythenatisus, immunodeficiency diseases such as acquired immunodeficiency syndrome (AIDS), graft rejection, viral infections including heparitis and human cimmunodeficiency virus (HIV), immune-mediated glomerulone-hitis, con haematologic diseases such as aplastic anaemia and chronic peutropenia and cancer. In addition they are also useful for treating or diagnosing various disorders associated with cell death, including mystardial confortion, stroke, neurological diseases including Alzheimer's and carrophy. IFN nucleic acids and polypeptides are also useful for diseases, amyotrophic lateral sclerosis and spiral muscular contentifying interferon-like proteins and interferon agonists, for screening drugs and compounds which inhibit or enhance IFN activity or function and as targets for the identification of small molecules that
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             new interferon induced polypeptides and polynucleotides, useful for diagnosis, prevention and treatment of immunological, cell proliferative disorders, such as lupus erythematosus, cancer, stroke and Alzheimer's disease
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              determining the presence of or predisposition to a disease associated with altered levels of IFN polypeptide or polynucleotide. IFN nucleic acids, polypeptides and antibodies are useful for diagnosis, prevention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Interferon induced nucleic acid; autoimmune disease; lupus crythematosu immunodeficiency; stroke; acquired immunodeficiency syndroms; AIDS; graft rejection; viral infection; hepatitis; aplastic anaemia; cancer; human immunodeficiency virus; HIV; immune-mediated glomers.lone; hritis; haematologic disease; chronic neutropenia; myocardial infarction; neurological disease; Alzheimer's disease; Parkinson's disease; tumour;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          20-JAN-2000;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Ş
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       밁
                   The sequence represents interferon induced polypeptide, IFN5. IFN conclete acids and polypeptides are useful for treating or preventing a CC pathology associated with IFN polypeptide in a human, they are useful for determining the presence of or predisposition to a discuse associated with IFN polypeptide or polynucleotias. IFN nucleic conclete, polypeptides and antibodies are useful for diagnosis, prevention or treatment of variety of immunological and cell proliferative concludes, such as autoimmune diseases e.g. lupus erythematosus. CC immunodeficiency diseases such as acquired immunodeficiency syncrome cc (AIDS), graft rejection, viral infections including hepatitis and human immunodeficiency virus (HIV), immune mediated glomeruloupphritis, had cancer. In addition they are also useful for treating or diseases and cancer associated with cell death, including myocardial confarction, stroke, neurological diseases including Alzheimer's and carrophy. IFN nucleic acids and polypeptides are also useful for contributions in therfare.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       20-OCT-1999;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             CC immunodeficiency diseases such as acquired mmunodeficiency syndrome CC (AIDS), graft rejection, viral infections including heratitis and human CC immunodeficiency virus (HIY), immune-mediated glomerul mephritis, CC haematologic diseases such as aplastic anagmia and chranic neutropecia and cancer. In addition they are also usefu for treating or diagnosing CC various disorders associated with cell death, including myocardial CC infarction, stroke, neurological diseases including Alzheimer's and CC Parkinson's diseases, amyotrophic lateral scierosis and spinal muscular CC atrophy. IFN nucleic acids and polypeptides are also useful for CC identifying interferon-like proteins and interferon agamists, for CC screening drugs and compounds which inhibit or enhance FN activity or CC care immunostimulatory, immunosuppressive, or stimulate or suppress normal CC cell or tumour cell growth in mammals, including humans

The present invention relates to the isolation of nove, human enzyme polypeptides, and the cDNA (AAS40785-AAS41884) and general sequences encoding them. The enzyme polypeptides of the invention may comprise functional classes of oxidoreductases, transferases, hydrolases, lyangement of the control of the c
                                                                                                                                                                       Novel polypeptides and polynucleotides userum for diagrasing, preventing, treating neural, immune system, uscular, reproductive, pulmonary, cardiovascular, renal, proliferative disorders and cance

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          The invention relates to a single exon nucleic acid probe for measuring human gene expression in a sample derived from human toetal liver. The single exon nucleic acid probes may be used for predicting, measuring and displaying gene expression in samples derived from human fetal liver. The present sequence is a peptide encoded by a single exon nucleic acid probe of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Note: The sequence data for this patent did not form part of the printed specification, but was obtained in electronic termat directly from WIPO at ftp.wipo.int/pub/published_pct_sequences.

                                                                                                                                                                                                                                                                                            The present invention provides a number of single exon nucleic acid probes which are derived from genomic sequences expressed in the human brain. They can be used to measure gene expression in brain call samples which may enable the diagnosis and improved treatment of nervous system diseases such as Alzheimer's disease, multiple sclerosis, schizophrenia,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Not I site. Double stranded cDNA was ligated to an EcoR I adaptor, digested with Not. and close differctionally into pT7T3-Pac vector. The originucles are used to prime the synthesis of first-strand cDNA contains a library tag sequence that is located between the Not I site and the (dT)18 tail. The sequence tag for this library is CGCTACGGAC. The cell lines was provided by Dr James Martin of University of Iowa.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    constructed according to Bonaldo, Lenn n and Soares, Genome Research, 6:791-806, 1996. First strand cDNA synthesis was primed with an oligo-dT stimer containing

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Conservative
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       /note-*Organ: colon; Vector: puc18; Sire_1: Smal; Site_2: Smal; A mini-library was made by clonic a products derived from ORESTES PCR (U.S. Letters Patent application No. 196, 716 - Ludwig Institute for Cancer Research) profiles into the pUC 18 vector. Reverse transcription of tissue mRNA and cDNA amplification were performed under low stringency conditions.*

                Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        285.4
